DETAILED ACTION

1. This is in response to the Reply filed 3/24/2005. The IDS filed 5/23/2005 is also acknowledged.

- 2. Claims 1, 4-23 are currently pending in this application. Claims 12-19 have been withdrawn as indicated in the Reply 8/10/2004. Claims 1, 4-11, and 20-23 are being considered.
- 3. In light of further consideration, the finality of the previous Office action is hereby withdrawn. A new rejection is issued as follows.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 1, 4-11 and 20-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gutweiler et al. (US Pat. 5,514,752).

Gutweiler teaches a high impact polypropylene molding composition, comprising a mixture of 1-99% by weight of polypropylene and 0-60% by weight of a rubber, such as ethylene propylene diene (see abstract; col. 1, ln. 12-16, 55-59), overlapping the instantly claimed ranges. Gutweiler further discloses the use of 90% by weight of polypropylene and 5.96% of EPM (see Examples 7-9), which reads on the instantly claimed range in claim 20 and approximates the claimed range in claim 1.

Art Unit: 1711

Gutweiler further teaches the molding can be used for the production of fibers that can be written or printed on (see col. 3, ln. 60-63). Therefore, it would have been obvious to one of ordinary skill in the art, at the time the invention was made, that Gutweiler's invention would be used in making textile fibers and other articles made therefrom. This is because fibers have been commonly made into textile, and by teaching the production of fibers, Gutweiler's invention would be inclusive of textile fibers or the like.

Response to Arguments

6. Applicant's arguments with respect to the rejection of claims 1, 4-11, and 20-23 over Ogale '756 have been considered but are moot in view of the new ground(s) of rejection.

Contact Information

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thao T. Tran whose telephone number is 571-272-1080. The examiner can normally be reached on Monday-Friday, from 9:00 a.m. - 5:30 p.m.
